Stampede Here Last Monday Was A Great Success

Weather Cool For the Occasion
Good Crowd in Attendance
Joe Wells wins Roman Race
Lorne Thomson the Bucking
Contest— Good Program

Redcliff's ninth annual Stampede was again well patronized on Dominion Day last Monday and from one o'clock till six in the evening the crowd was entertained to a continuous program of horse races, bucking contests, steer riding, calf roping, and athletic events.

The program was opened with a complete list of foot races for school pupils of all ages and, needless to say, every item was well patronized. This was followed by a Mixed Women's race which was also well patronized.

From this on the Stampede Grounds resembled a big three ring circus with something going on either at the corner or on the track all the time.

There were not so many entries in the horse races as usual but all the races were closely contested furnishing all kinds of excitement for the crowd.

A feature of the horse races was the Roman race in which there were three contestants. In the first heat all three got away to a fine start and made a real race for the full half mile.

Mr. Joe Tester who was one of the contestants, was greatly admired for his agility and dexterity in this difficult race. She drove her horses to second place in the first heat but her horses became very restive at the other heats. Joe Wells and Foster Dacre, the other riders also gave a splendid exhibition.

The relay race of 1 1/2 miles with three horses also furnished considerable excitement for the spectators.

In the Amateur Athletic events there were a good many entrants and all were closely contested.

There was a splendid bunch of bucking horses, wild steers and calves for the contests at the corral and some splendid exhibitions were put up.

The several committees in connection with the day's program worked hard to make the event the success it was. They are deserving of great praise and are entitled to most support and encouragement from the citizens generally, than they have received during the past few years.

Much credit for the success of the athletic events is due to the assistance the local committee received from Hector Lang M.L.A. and Chief Taylor of Medicine Hat.

The following is a list of the prize winners.

Saddle Horse Races
Boys 15 and under—1, E. Schaeffer; 2, W. Lapp.

Girls 15 and under—1, M. Schilmer; 2, E. Schaeffer.

Six Furlongs—1, G. Ellis; 2, W. Schaeffer.

Shetland Pony—1, J. Dacre; 2, W. McLeod.
Half Mile—1, W. Lapp; 2, R. Page; 3, F. Rance.
One Mile—1, G. Ellis; 2, G. Peterson.
Quarter Mile—1, R. Page; 2, Mrs. Tester.
Pony Race, 1 1/4 hands—1, R. Page; 2, L. Bainbridge.
Relay Race, 3 horses—1, R. Page; 2, F. Dacre; 3, J. Walker.
Ladies Race—1, Mrs. Page; 2, Mrs. Tester.
Roman Race—1, J. Wells; 2, F. Dacre; 3, Mrs. J. Tester.
Consolation—1, J. Walker; 2, G. Ellis.

Bucking Contests
Riding with Saddle—1, L. Thompson; 2, Brad. Cocker; 3, Cecil Young.
Steer Riding—1, L. Thompson; 2, G. Jenkins.
Calf Roping—1, Ed. Quinn; 2, V. Lawrence; 3, B. Dixon.
Amateur Athletic Events
100 yards (open)—1, G. Simmons; 2, M. McArthur; 3, L. Pollitt.
220 yards (open) 1, G. Simmons; 2, M. McArthur; 3, L. Pollitt.

100 yards Boys 19 and under 1, M. McArthur; 2, M. McNaught; 3, T. Pollitt.

880 yards (Relay, Fur to a Team)—1, Rangers' Team; Medicine Hat; 2, Redcliff Team; 3, Norton Team.
High Jump—1, J. Woznow; 5ft. 7in. 2, G. Simmons; 5ft. 6in. 3, L. Nicholson; 5ft. 5in.
Pole Vault—1, J. Woznow; 8ft. 5in.; 2, C. McIntosh; 3, L. Nicholson.

Running Broad Jump—1, J. Woznow; 19ft. 8in.; 2, G. Simmons; 19ft. 6in.; 3, M. McArthur; 18 ft. 4 in.

Half Mile (Special Event)—1, M. McNaught; 2, A. Hart; 3, L. Nicholson.

The school children's race program was so long that we have not space for it this week.

Mr. and Mrs. Copple of Calgary, arrived in town on Saturday morning to attend the funeral of the late Mr. Arthur Hodges. While here they were the guests of Mr. and Mrs. John Kitcher.

Redcliff Reminiscences

Taken From the Review File of July 9th, 1915

Walter Richard, a young farm hand employed by Jas. Meyer near Bowell, met his death by falling under a steam plow last Saturday.

Prof. A. G. Christie of the mechanical engineering department of the John Hopkins University, is the guest of Mr. P. Lavelle this week.

Twelve more Redcliff boys have joined the corps. They are: W. Cowell, Chas. Duffin, Tom Bowtell, Bob Everett, H. Arnold, Clarence Walker, Ted Worts, Donald McKay, W. Bentley, Jim Chasterton, Wm. Miller and W. Waters.

At the Box Springs picnic on Dominion Day the following from Redcliff were among the prize winners: Young man's race, Allan Ellis. High jump, Rex Rose. Boys' half mile race, W. Duggan, Wilfred Campeau.

The Week at Ottawa

Canada, like some thirty-six other countries of the world has now a Central Bank, called The Bank of Canada. The need of it will be in Ottawa and branches may be established in other places in Canada or outside of Canada, the management shall consist of a Governor, a Deputy Governor and seven directors. The Prime Minister has stated that the Governor will be some one from England and this was the occasion for a rather bitter debate. One side felt that a man experienced in international banking, should be appointed, and the other side argued that some one familiar with the racial and economic conditions of this country should be appointed.

The Governor and Deputy will be full time men. The stock of the bank will be sold to the public and the rate of interest paid to shareholders will be 4 1/2 per cent. If more than this is made as profit, it goes to the treasury. The note issue privilege shall be withdrawn gradually from the Chartered Banks: 5% for five years, then 10% for five years, in all 75% starting in 1936. A long debate followed the clause on private ownership. The government members voted to a man for private ownership and all the others for government ownership.

The bank will take over the seventy million dollars worth of gold from the Finance Department and also all the gold from the private banks. The banks will be allowed \$20.07 per cent for their gold and not \$54.27 which is the present price.

The Bank will act as the financial agent for the Dominion government and probably for provinces. The banks may buy and sell gold, buy and sell Dominion securities, buy or sell or discount bills of exchange endorsed by the Chartered Banks in connection with the marketing of products, make loans to the Dominion or the provinces, accept deposits from Governments or Banks without interest and deal with the central Banks of other countries. The Bank will not deal with individuals in a banking capacity, but supervise the Chartered Banks.

The gold coverage for the bills in circulation is officially reduced from 40% to 25%. This means that with the seventy million dollars worth of gold, two hundred and eighty millions in currency can be issued. At present there is only about two hundred and thirty counting the fifty million recently provided for in connection with the Public Works program.

Very few changes were made in the Bank Act except those necessary to fit the Bank of Canada Act.

There are many districts designated over the Works program. Many Military Buildings are being constructed and in some cities they are not needed. I spoke on this motion and urged that Severage Disposal Works be constructed to protect the health of the communities and that Water Conservation Res.

Results of Local Public School Exams.

The following are the results of the midsummer examinations in the several grades in the Public School.

Grade One to Grade Two
1. Andrew Madsen; 2. Eileen Johnson; 3. Ethel King; 4. Colleen Jacobson; 5. Bruce Sheasby; 6. Florence Cooper; 7. Billy Harrison; 8. Velma Osagood; 9. Peter Balser; 10. Roy Willis; 11. Ronald Leppard; 12. Basil Tucker; 13. Doris Mathay; 14. Marjorie Horne; 15. Dicky Hargrave; 16. Norma White; 17. Tommy Balmer; 18. Nic. Balser; 19. Roy Rexin; 20. Margaret Gordon; 21. Evelyn Waters; 22. Doreen Fitzhugh; 23. Jacky Hope; 24. Ernie Goodline; 25. Agnes Gordon.

Grade Two to Grade Three
1. Gladys Johnson; 2. Billy Martin; 3. Mary Jeric; 4. Gordon Hurlbert; 5. Dorothy Lien; 6. Ruth Jorgensen; 7. John Cooper; 8. Kathleen Cooke; 9. Florence Campeau; 10. Donald Hargrave; 11. Laurie Mallard; 12. Bertha Schneider; 13. Joe Bales; 14. Dorothy Walton; 15. George Myers; 16. Billy Johnson; 17. Donald Sauter; 18. George Skidmore; 19. Leopold Bulanda; 20. Betty Stratton; 21. Altha Schaeffer; 22. Donald Horne; 23. Winnie Phillips; 24. George Goodline; 25. Howard Waters; 26. Marion Jeric; 27. Jimmie Dacre; 28. Earl Tislag; 29. John Moore.

Grade Three to Grade Four
1. Edna Martin; 2. Gordon Sheasby; 3. Katie Brucker; 4. Robert Pedersen; 5. Cecil Sangster; 6. Billy Hnatkin; 7. Muriel Elchen; 8. Reginald Jorgensen; 9. Betty Rainer; 10. Bobby Wyatt; 11. Roy Newham; 12. Lizzie Wells; 13. George Hope; 14. Horace O'bear; 15. Theresa Arnold; 16. Louise Fitzhugh.

Grade Four to Grade Five
1. Florence Bally; 2. Kenneth Simpson; 3. Hazel Ruid; 4. Mary Ewen; 5. Richard Cooper; 6. Cyril Worts; 7. Helen Rexin; 8. Peggy Reid; 9. Eileen Cooke; 10. Helen O'bear; 11. Edward Martin; 12. Bessie Gordon; 13. Alfred Goodline; 14. Eileen Horne; 15. Adrienne Garner; 16. Marie Fitzhugh; 17. Mable Shaw; 18. Basil Moore; 19. Laur Le Sween; 20. Irene Pearson; 21. Kate Luna; 22. Joel Bastien; 23. Muriel Brydie; 24. Wilfred Fairhurst; 25. Harold Congram; 26. Ruth Lien; 27. Ronald Johnson; 28. Billy Bales; 29. George Broughton; 30. David Lloyd.

Grade Five to Grade Six
1. Kathleen Sheasby; 2. Flora Stratton; 3. Evelyn Kaldstad; 4. McGregor Lindsay; 5. Winnifred Bamforth; 6. Stanley Lennan; 7. Anna Jorgensen; 8. Artie Rexin; 9. Eugene Rose; 10. Mable Humphrey; 11. Genevieve Bales; 12. Evelyn Fulton; 13. Zella McKay; 14. Kate Evans; 15. Elizabeth Arnold; 16. Violet Hope; 17. Wilfred Hurlbert; 18. Kenneth Wilson; 19. Joe Bruckner.

Grade Six to Grade Seven
1. Joan Walton; 2. Norma Osagood; 3. Harold Moseholm; 4. John Walton; 5. Marjorie Fairhurst; 6. Fred Blades; 7. Ruth Shaw; 8. Betty Gordon; 9. Esther Rexin; 10. Collis Walton; 11. Donald Johnson; 12.

Arthur Hodges Passed Away Last Thursday

Funeral Held Here Last Sunday Afternoon

Mr. Arthur Hodges, who has been seriously ill at the Beicher hospital for the past few months, passed away last Friday morning.

The late Mr. Hodges was a resident of Redcliff for the past twenty years except for the time he was overseas. He enlisted with the 17th. Prior to enlisting he was of a robust constitution but the hardships of the war undermined his health and almost ever since his return to Canada he has been under the doctor's care.

Deceased was born in London, England, sixty years ago. He came to Canada when a young man and worked at various occupations until he enlisted.

Arthur Hodges was of a jovial disposition which won for him many friends. Deceased leaves one daughter, Joyce, and one son, William, both of whom reside in Redcliff. Mrs. Hodges passed away only a few months ago. The sympathy of the entire community goes out to the two children who have been so greatly bereaved in so short a period of time.

The funeral took place from St. Ambrose Church on Sunday afternoon and was largely attended. The remains were interred in Medicine Hat Cemetery.

Mr. R. Simpson and son Kenneth left on Saturday for a two weeks' holiday at Vancouver.

Mrs. A. J. Learmonth spent last week-end in Calgary visiting her daughter, Miss Nanette.

Miss Margaret Selthorn spent the weekend visiting friends in Calgary.

Gordon Memorial Sunday School picnic will be held on Wednesday afternoon, July 18, in Central Park, Medicine Hat.

Miss Broadfoot left on Monday night for Edmonton, where she will attend Summer School at the University of Alberta.

David Gordon; 13. Mary Lidick; 14. Annette Bastien; 15. Lillian Johnson; 16. Gwen Evans; 17. Leonard Morton; 18. Daisy Harris; 19. Arnold Hurlbert; 20. Deane Cooke; 21. Stanley Rose; 22. May Martin; 23. Jessie Stratton.

Grade Seven to Grade Eight
1. Ralph Ruid; 2. Kathleen Fulton; 3. Thora Garner; 4. Lynn Ellis; 5. Zelma McKay; 6. Jona Lennan; 7. Evelyn Fitzhugh; 8. Roy Allanback; 9. Harold Sween.

Grade Eight to High School
1. Kaja Madsen; 2. Ralph Hargrave; 3. Carol Selthorn; 4. Annie Schmidt; 5. Lela Banforth; 6. Alfred Schaeffer; 7. Annie Bolton; 8. Jessie Stratton; 9. George Ballantyne; 10. Gordon Newham; 11. John Garrecht; 12. Ellen Hope; 13. Robert Fulton; 14. Alice Buchholz; 15. Effie Stratton; 16. David Peterson; 17. John Balmer; 18. Janet McFadden; 19. Eva Lico; 20. Eddie Harris.

Sad Drowning Accident at River Here Yesterday

Mildred Walton Loses Life Trying to Save Friend

What was intended as a pleasant picnic outing on the banks of the river yesterday afternoon resulted fatally when Mildred Walton lost her life by drowning.

The circumstances surrounding the case are most pathetic. Mildred with her sister Joan and Dolly Wells had gone swimming. They had not been in the water long when it was seen that Dolly was in difficulty. Mildred rushed to her assistance and in the struggle, both girls became exhausted.

Willie Pearson and Jim Fulton who were across the river in a boat, came to the rescue. When they arrived Mildred was out of sight but Dolly was still struggling. The boys managed to get Dolly ashore and after administering first aid revived her.

When it was first seen that the two girls were in difficulty Joan went to the assistance of Mildred and when Joan could not weather the swift current Mrs. Walton went into the river with all her clothes on. Almost miraculously she rescued Joan. Almost exhausted and in a state of collapse Mrs. Walton had presence of mind enough to send the boys up to town for assistance. Several cars of men responded and young men dived around the spot where Mildred was last seen. Mounted Police arrived later with dragging equipment and worked till dark but up till the present the body has not been recovered.

Mildred was a bright young girl, 16 years of age. She was a strong swimmer but could not master the treacherous currents of the Saskatchewan.

This is the first drowning in the river since the swimming pool was opened here several years ago.

Judge Does Not Allow Damages in The Brownlee Case

Judge Overrules Jury's Award For Damages

In the case of John E. Brownlee, charged with seducing Vivian McMillan, the Jury brought in a verdict of guilty and assessed damages at \$10,000 for Miss McMillan and \$5,000 for her father.

Following the jury's verdict Council for defence moved for a dismissal of the action. Justice Ives gave his ruling yesterday, which means in effect that Vivian McMillan and her father will not only lose the monetary verdict but will be required to pay the costs of the action, believed to run into several thousand dollars.

Mr. and Mrs. Edward Ellis left on Saturday for Elkwater Lake where they will spend a short holiday.

Movement Of Low Pressure Area Has Decided Effect On Rainfall In Western Provinces

The third quarter, the drought is forgotten. A few showers of rain fall, and the refreshments of the soil allays the anxiety bred in the drought. The score is forgotten. This rapidity is human, but it cannot divert the climatic cycles. These go their way, advancing or receding. They are ruled by laws, and either may be ruled by fixed phenomena or by Nature's unpredictable whims. Which of these orders our climate, none can say. The meteorologist cannot. They can, after all, record climate only as it reveals itself.

And the overwhelming climatic revelation in this part of the world in recent years is that its low pressure area has moved. It used to be roughly, across the Kansas line. It has gone north, and is estimated to be far north of here, perhaps in the Hudson.

This movement of the low pressure area has definite climatic effects, which can be stated in simple, though probably peevish, terms. The laden warm air from the Caribbean Sea provides the moisture for the centre of this continent. It rolls up the vast central region, passing on northward across these prairies.

As this laden air reached the low pressure area, due process produced the rain that fell on the prairies. The result, that is, in simple terms, is that the warm air, which could not be the distilling process, and there would be no rain so, when the low pressure area moved, the moisture in the air from the Caribbean was not distilled, but was carried unaffected, beyond us. The rain that ought to have been falling on us for the last few years is presumed to have been falling far north to the Hudson.

Why the low pressure area has moved is not explained. When it will return, or that it will return, or whether it has any cyclic rotations, is not known. Its movement, whatever its cause, is independent of human motives. It cannot be stayed, and it cannot be replaced. Whether it has reverted to the southern latitudes, or whether it ever will, the scientists seem unable to say.

As the present rain may be a result of a return of the low pressure area to a line south of here, but there is nothing to insure that it will return. It may be that it has returned, and means to stay put, but the consequences will soon assert themselves on the meteorological chart. The laden air from the south will have its moisture extracted to drop in freshening rain on the prairies, again to permeate our seeds and give the yields of our culture. The relief is a boon, a blessing, but it depends on the degree of fatigues of the low pressure area. So long as that stays south of us, our fruitfulness cannot be stunted, should it persist in staying far north of us, drought must continue over the centre of the continent, as it has done more or less for the last few years—Winipeg, Free Press.

Saskatchewan Fish

Now Taking Trout From Lakes That Never Had Fish Before
Canada now has game fish in formerly barren lakes in the Maritime and prairie provinces, and in British Columbia. J. A. Rodd, director of fish culture, Dominion department of fisheries, told the senate committee on sealing and fisheries.

"Fishermen in Saskatchewan are now taking 18-pound trout from lakes that never knew fish before," Mr. Rodd stated. "European brown trout were transplanted to the 27 press lakes, Saskatchewan, in 1921, and Regina fishermen are taking trout up to 16 pounds." "Whitefish from Lake Winnipeg were transplanted to the Quill lakes, Saskatchewan, which are highly suitable," Mr. Rodd said. "These fish are propagating."

Lakes Being Cured Man

Tourists on the Elbeberg, near Glengarry, Lower Austria, came upon a wild-looking man in a cave. At first he fled from them, but eventually spoke to them and proved to be an educated man born in Vienna. Long unemployment had caused the man to flee the haunts of men. He lives on berries and mushrooms, and says he has no wish to return to civilization.

W. N. U. 2061

The Brainiest Animal

Well-Known Psychologist Thinks Chimpanzee Is Most Intelligent.
Association with man evidently does not help an animal to increase its intelligence. In a controversy regarding the intelligence of the animal world, the claims of the cat, dog, and horse were summarily dismissed on the ground that they learn their feats and tricks by the trial and error method, much as a man learns to ride a bicycle without applying any brain power. Professor Cyril Burt, the well-known psychologist, championed the chimpanzee as his animal intellectual. Then an official of the Brown Animal Institution drew attention to the leaver's ingenuity. But neither of these animals according to a group of German psychologists, possesses the industry of the elephant. And what of the ant? It does seem, as though scientists will have to test these candidates a series of intelligence tests.

An Interesting Report

U.S. Senators' Brains Heavier Than Those Of House Members
Senators' brains weigh more than those of members of the House of Representatives, according to a "legislative anthropology" report made by the American Association for the Advancement of Science. Dr. Arthur Macdonald, of Washington, who had estimated the weight of the brain of eighty-nine of these law-makers and had found that for seventy-one members of the House the average weight was only 1450 grams, while for senators it was fifty-two per cent.

Winipeg Newspaper Union
The Winnipeg Newspaper Union, which has been in existence for many years, is now in a state of liquidation. The union has been unable to raise the necessary funds to keep it going, and the members have decided to dissolve it.

By Ruth Rogers

FREE AND EASY TO WEAR AND SMART IT CAN HAVE PUFFED SLEEVES OR WEE

Growing daughter will look adorable in this cute dress with its smart sophisticated lines. A cool crinkled cotton in Chinese blue and white, perfect for summer, made the original model. It is so practical, and needs no ironing. See new sketches! It can have wide puffed sleeves or a capped shoulder—pattern pieces for sale.

Red plaided gingham, yellow plique, plaid muslin, etc., are sturdy mediums.

For daintier wear, handkerchief-hemmed lawn, voile and lattice prints are attractive.

Style No. 800 is designed for sizes 8, 10, 12 and 14 years.

Size 8 requires 3 1/2 yards of 35-inch material.

Price of pattern 20 cents in stamps or 5c in cash (if preferred). Wrap coin carefully.

Conserving Game In Africa

System Of National Parks Similar To That In Canada To Provide Sanctuary For Wild Life

The Minister of the Interior has just received from the Secretary of State for External Affairs, Canada, a concise report on the International Conference for the Protection of Fauna and Flora of Africa. At the conference, which met in London, the following governments were represented: Union of South Africa, Belgium, Great Britain, Egypt, Spain, Abyssinia, France, Italy, Portugal, Anglo-Egyptian Sudan.

The conference concluded that the natural fauna and flora of Africa, were in danger of extinction or permanent injury and steps are to be taken for their preservation by the governments represented. Canada, in company with all other nations, would suffer from the destruction of these resources of Africa by the chief interest to Canadians in the result of the conference is that it was the unanimous conclusion of the delegates that the best way to preserve the fauna and flora was by the establishment of National Parks in representative districts within which areas the destruction of wild life and of flora would be prohibited.

If this matter of the establishment of National Parks in Africa were to be preserved in their present condition, Canada is in line with the foremost countries of the world. Moreover the fortunate thing is that Canada began this work early in her development with the result that it has been done in the most economical manner. In this way there are being conserved, both for Canadians and for visitors from abroad, areas of grandeur and loveliness containing indigenous animals and plants—resources which might otherwise have been completely lost to the nation.

Knight Manages Palace

Responsible For Much Of Domestic Efficiency At Buckingham
Sir Ralph Harwood, who received a K.C.B. in the New Year honors list, is responsible for much of the efficiency with which the domestic organization of Buckingham Palace is conducted. In the early days of Queen Victoria the system for running the palace was so chaotic that it led to "discomfiture, extravagance, incessant annoyance and distraction." It was not until after the war, however, that Sir Ralph was recommended from the Treasury to be appointed deputy treasurer of the household. The post was not a popular one, but in co-operation with Queen Mary, Sir Ralph succeeded in eliminating all sorts of wasteful practices, with the result that Buckingham Palace is now one of the most economically run houses in the country.

The Force Of Thought

Thoughts are forces, in that they have form and quality and substance and power; that they are the silent, unseen, but subtle agents at work, that they are daily and hourly producing and determining, and with almost absolute precision, the conditions in our lives.

British motorists are now paying from 30 to 34 cents a gallon for petrol after a recent general reduction of two cents a gallon.

BLAMES FRANCE

Archbishop of Canterbury Cautious in His Remarks

The Archbishop of Canterbury caused a mild sensation in the House of Lords when he declared France largely to blame for the failure of the Geneva disarmament negotiations. The Archbishop said he was convinced that disarmament had been wrecked by the French. "Germany will arm herself in accordance with what she recognizes to be the continued suspicion of France."

Origin Of The Woolack

Initiated In Victoria's Reign To Prevent Foreign Import

The Worshipful Company of Woolmen is petitioning the Court of Aldermen for an increase of livery. This City Guild is of ancient foundation, dating from the time when wool was the staple industry of England. The Lord Chancellor's wool sack itself was instituted in Queen Victoria's reign, when an Act was passed to prevent the importation of foreign wool. It was thought that the presence of wool there would be a reminder of the commodity that was the main source of our national wealth. The Church of St. Mary, Woolchurch, which had been destroyed in the great fire, over its name to the fact that there is a beam in the churchyard for weighing wool. The Mansion House party stands on the chair site.

Slow Waiter—"Have you ordered anything, sir?"

Disturbed Diner—"Well, I ordered for Christmas pudding, but that was so long ago good better bring me a hot cross bun."

Wife:—"The night before last you came home to-day. If you come home tomorrow tonight, there'll be trouble!"

British Scientists Will Carry On Scientific Investigation In Canadian Arctic Archipelago

Demand For B.C. Vegetables

Fraser Valley White Growers Find Market On Prairie

From commercially small beginnings, commercial vegetable production by white growers of the Fraser Valley has developed this year into a million dollar industry.

Large quantities of produce are not only being supplied to Vancouver markets, but at least 70 carloads of vegetables will roll to the prairie provinces this season.

Until a few years ago, Oriental growers practically controlled production and marketing of the vegetables of the lower mainland.

Diminishing returns in the dairy and poultry industries forced the white farmers to develop other lines of income and vegetable production has become a vital factor in helping the farmer to balance his budget.

The venture has proved a pronounced success.

Through close study of application of fertilizers, crop rotation, use of select seed, and modern cultural methods, the white growers in B.C. to-day are producing a standard of vegetable unexcelled.

Chinese Show Good Sense

Association For Marriage Reform Adopts Some Sensible Rules

Guests at Chinese wedding parties must leave before 12 midnight, it was resolved at the annual meeting of the association for marriage reform in Shanghai. Chinese weddings often plunge the families concerned deeply into debt and, in an effort to alleviate this expense, it was resolved "no wedding gift shall cost more than \$1, banquets at weddings shall not cost more than \$4 for each table and eight guests and no bands nor fireworks shall be used at weddings." In an effort to assist China's native industries, the association also resolved, "that all dowries of brides and all wedding gifts shall hereafter be only native Chinese goods."

Past Stock Show Postponed

Saskatoon To Hold Annual Exhibition Early In August

Saskatoon's Past Stock Show, announced for June, has been postponed until the annual exhibition early in August, according to manager S. W. Johns. It was found that the quota for export is now practically filled and that in all probability there would be quite a reduction in cattle prices during June. The next year's quota, however, starts on July 1, and although this means keeping the cattle another six weeks the exhibition authorities decided it would be a kindness to the exhibitors to delay the sale.

"Yes," said the enthusiastic motorist, "she'll do eighty-five."

"Per hour, per gallon, or perhaps?" inquired the wag.

It Was Announced By Honourable

Thomas G. Murphy, Minister of the Interior, that permission had been granted for a party of British scientists, headed by Professor J. M. W. W. M., of St. John's College, Cambridge, to carry on scientific investigations and collect specimens along the eastern and southern coasts of Baffin Island and westward to the Parry Islands.

The expedition which sailed from Aberdeen, Scotland, on May 24 in the "Hibernia" a seventy-ton sailing schooner will proceed to the Canadian Arctic archipelago via Cape Parwell, Greenland, stopping at the island to refuel. From there the expedition will follow the west coast of Greenland and it is expected will cross Melville Bay and the Parry Islands. If ice conditions permit Smith Sound will be negotiated immediately, if not the expedition will continue along the Greenland Coast to Etah and then cross to Bache Peninsula.

Working along the east coast of Ellesmere Island, the ship will turn into Jones Sound, where surveys of the coasts of the islands to the north will be made. If the expedition will follow the west coast of Greenland and it is expected will cross Melville Bay and the Parry Islands. If ice conditions permit Smith Sound will be negotiated immediately, if not the expedition will continue along the Greenland Coast to Etah and then cross to Bache Peninsula.

A Meadow That Flouts

Strip In Germany Rises When Raines

When spring rains swell the tiny river Hanne, near the small city of Osterholz, in Hannover, Germany, and it floods its banks, a strip of meadow on the south bank of the river, of a mile to a mile wide and three and one-half miles long, begins to rise, with all its trees, including even great oaks and beeches. The whole meadow is afloat, and even in normal times one feels it give under the feet. Some 200 years ago the river is said to have loosened a small farm with house and barns and carried it for an hour downstream so gently that the sleeping family did not wake.

In Hundred Years

The Toronto Globe says one hundred years ago the boat was made that a "swift" passenger vessel was making the trip from Kingston to Toronto in sixteen hours. In those days also completion of the coach journey between this city and Hamilton "during daylight hours" was guaranteed. During the century there has been some speaking up both in land and water transportation.

Frog Disturbed Prisoners

Because the nocturnal croakings of an imprisoned frog disturbed the numbers of county prisoners, workmen, tore out the wainscoting of the basement walls of the county jail at Nottingham, Va. In an effort to free the squeaked croaker, Sheriff T. C. Fraser ordered the frog hunt begun. But, Burke has complained the past two weeks from prisoners.

Receives Appointment

Lieutenant Desmond Burke, noted Canadian rifleman and once winner of the King's prize at Blaisy, has been appointed assistant medical officer of the Governor-General's Foot-guards. He recently graduated in medicine from Queen's University, Kingston, and is a member of the Queen's Guards uniform for several years.

HAPPY RE-UNION AS GERMAN SOCIALIST MEETS WIFE IN ENGLAND

Frau Seger (left), wife of Herr Gerhard Seger, formerly a Socialist member of the Reichstag, arrived at Croydon Aerodrome, London, after her release from a German concentration camp near Dessau, where she was met by her husband. Frau Seger was arrested as a hostage after her husband had escaped from a concentration camp and it was through the efforts of Mrs. M. C. Tate, British Member of Parliament (right), that Frau Seger was released. The happy couple had not seen each other for six months.

Here and There

8. S. Embassy of Japan arrived at Victoria recently with one of the largest passenger lists in the past three years. There was a total of 577 from the Orient and Honolulu. The liner was also heavily booked for the westbound trip from Vancouver and Victoria.

Speaking at Toronto recently before members of the International Building Owners and Managers Association, E. W. Beatty, K.C., chairman of the Canadian Pacific Railway, doubted the wisdom of "too elaborate planning" in national economies. Mr. Beatty did not think the present system of society was wrong except in the "way in which it is administered."

The Canadian Pacific Railway will celebrate the fiftieth anniversary of the completion of its transcontinental line next year. It was November 7, 1885 that Donald A. Smith, later Lord Strathcona, drove the last spike at Cranleith Junction east to west and Atlantic to Pacific.

Hon. Charles A. Dunning, vice-president and general manager of the Seaport Club, Montreal, Quebec, has been elected a director of Barclay's Bank, Canada. The former Federal Minister of Finance is also president of the Ontario Equitable Life Insurance Company.

After one of the most remarkable and successful meetings ever held by a religious body, the Oxford Group left the Grand Springs Hotel for the East. Many of them sailed from Quebec by S.S. Empress of Australia for England. The next home party will be held at Oxford July 1-14.

Speaking at the Admiral Beatty Hotel, Saint John, Sir William Clark, British High Commissioner to Canada, claimed that the real source of Canada's troubles in connection with marketing agricultural produce lay in the uncoordinated expansion of agricultural production by industrial countries, especially some of the larger European countries which are normally importers.

Music, moonlight, glorious lake breezes with 600 miles of sailing on the Canadian Pacific's Great Lakes ships Assiniboia, Norwatin and Manitoba are at the disposal of passengers on the company's lines this summer at low cost. The offer promises to be very alluring to Canadians and visitors to the Dominion as well.

Quebec Province is alive with festivity, celebrations and gala events this year marking the anniversaries of some of the most memorable events in its history. Among them and the most important is the 400th anniversary of the discovery of Canada by Jacques Cartier in July 1534.

A Mediterranean-Africa-South America cruise in the 52,000-ton liner Empress of Australia, visiting 24 ports in the Mediterranean, Palestine, Egypt, East and South Africa, South America and the West Indies will be operated next winter. It is announced by the Canadian Pacific. The cruise will take 26 days, leaving New York January 15, 1935 and returning there April 24.

DOMINION TIRE DEPOT

THE WEEK AT OTTAWA

Metals In Human Body

English Doctor Says Last Has Been Indefinitely Extended

Speaking to the Staffordshire Branch of the British Medical Association, recently, Dr. J. H. Sheldon, of the Royal Hospital, Wolverhampton, gave a list of metals that may be found in the human body, and described research work that he had been doing in the discovery of these. There is lead in the liver, silver in the thyroid gland, and there may be tin in the lungs, but why they are all there is a mystery which science is only just beginning to investigate.

The list of minerals which may be found in the body, Dr. Sheldon stated, has been almost indefinitely extended. It includes "silicon," which is very nearly glass, arsenic, which is quite definitely lethal, and manganese which one should be more inclined to look for in steel. In deciphering these elements in the body, Dr. Sheldon has himself played an important part, and in his address he paid tribute to the valuable work of Mr. H. Ramage, of Norwich, who has made use of the most delicate methods of light analysis for the same purpose.

Silver has a stimulating effect on the growth of watercress, and also a precocious development of the nicotine-secreting glands of the tobacco plant, while having a stunning effect on the roots. The thyroid gland, which in human beings is connected with growth, is especially rich in silver. So are the lungs, which are particularly active in childhood. Zinc, chiefly associated with galvanization, is also found in all tissues, and, at least, in the rat is essential to normal production.

Manganese is found in the blood and in the adrenal glands, which play an important part in the control of the entire "sympathetic" nervous system. Although a poisonous gas, bromine, is constantly present in the blood. But in cases of "mania depressiva psychica," the quality is cut down to the level of "bromine water."

Lead is found in the blood, connected with old age, for the quantity in the blood decreases after the age of 45, and by 75 only the merest trace can be found. "It is hardly yet realized," Dr. Sheldon states, "how much the balance of the 'trace' element may be altered in our diet by the widespread use of various chemical fertilizers and insecticides. It is a little doubtful that with advance in knowledge, this will need investigation." He stated that the body cannot be regarded as a democracy, but is rather an oligarchy, in which a large number of passive elements are ordered and governed by a small minority of active ones. "The biological investigation of these very active elements," he ends his survey, "has not yet been fruitful."

Becoming Small Eaters

Female Shoo Australia Eat Less Than Parents Did

Australians to-day eat far less than their parents did. This is revealed by government statistics showing that compared with an average man 20 years ago, an Australian now eats: 75 pounds less meat a year; 70 pounds less potatoes; 34 pounds less flour, less bread, less rice, less sugar, less porridge, less jam. Less tea and coffee are drunk. The little things showing increases are butter, cheese, fish and milk. It is pointed out that the tendency to eat less was noticeable years before the depression.

Troubles Of The Printer

The typographical error is a slippery thing and sly. You can hunt until you are dizzy, but it somehow will still be there. The form errors are of the press, it is strange how they get it. It shrinks down to a corner, and it never strays or peeps. That typographical error, too small for human eyes. Till the ink is on the paper, when it grows to mountain size. The boss, he stares with horror, then he grabs his hair and roars: "The copy reader drop his head upon his hands and groans." The remainder of the issue may be clean as clean can be. But that typographical error is the only thing you see.

Horse Is Kidnapped

Horses have caught the fancy of kidnappers now. A young Pacer stallion owned at Louisville, Kentucky, was stolen from this horse and a note left asking \$200 as a ransom. A postscript added "This horse ain't worth what we fearst thou. Bring \$200."

W. N. U. 0051

Once Important Custom

Curfew Is Still Run In Many English Towns

The well-known tradition, "Curfew Must Not Ring To-night" was written about the curfew bell of St. Mary's Church, near the Market in Surrey, where it rings every night during the winter until March—as it has done for centuries.

Curfew was the only place where the curfew can be heard, for these ancient bells are still rung in many towns and villages. This shows how general the custom was once, and indeed, the ringing of the curfew was once one of the most important customs. Wherever there were people living, there the curfew had to be rung. These were the Kings' orders.

William the Conqueror was the first king to make this custom a strict law, and every night at eight o'clock the curfew bell was rung, which meant that all fires and lights had to be put out, and everybody had to go to bed. These found outside by the king's soldiers after the bell had rung were severely punished. As the years went by the rules were made less strict, and the hour of bed-time grew later.

It is said that only in one place was the curfew allowed to be rung later than anywhere else. This was at St. Mary-le-Moor, at Wallingford, in Berkshire, where the people rang the bell outside William after his victory at Hastings. As a reward for this welcome the new king granted exemption for the curfew to be rung at nine o'clock at night.

The reason for the curfew was that in these early days all the houses claimed, and the houses were drawn. There were no chimneys, and the smoke had to escape through a hole in the roof, and as the houses were so close together, and thus fire often occurred. To prevent this happening at night the rule of putting out all fires was strictly enforced. The houses were usually extinguished by placing over them a large copper hood.

Planting Perennials

When Once Established Bed Will Last For Years

Most perennials should be planted early. A bed composed of peonies, delphiniums, iris, oriental poppies, and Canterbury bells, such as other beautiful plants, will last for years, and it is difficult to work it much once such flowers are established. It is important to have the soil well prepared before planting and it must be dug thoroughly and plenty of fertilizer worked in. Delphiniums must be provided as a perennial bed that stands under water in the early spring, will soon lose much of its vigor.

Care should be exercised against over-crowding as this will mean that the plants will be crowded. In the little things, the greatest difficulty in removing weeds. With many of the perennials, particularly the iris, evening primrose and the delphiniums, such as Delphinium, it will be best to move every two to four years, as clumps die out in the center and new divisions come to give better results than old plants. Most of this dividing and replanting will be done in early spring, though there are some exceptions, notably the oriental poppy which is best moved in August, and iris and peonies, which are usually shifted in September.

Weight Of Hay Estimate

Difficult Problem To Guess The Weight Of A Stack

The most difficult problem in guessing the weight of hay is to estimate the number of cubic feet required to make a ton. Rules vary widely in different parts of the country. One rule states that when hay has stood less than one month, it requires 580 or more cubic feet of hay to make a ton, where it has stood one month, 612 cubic feet, where it has stood five or six months, 422 cubic feet, and where it has remained standing for one year, 343 cubic feet. If it is at all possible, it is very much more satisfactory to weigh the hay, or at least to weigh one wagon or more before estimating the weight of similar stacks or mows.

Canada's Hog Marketings

In twelve years Alberta's hog marketings have increased from a total of \$84,000 in 1923 to \$1,032,000 in 1934. This province is now second only to Ontario in total marketings, and between them, these two provinces market about 75 per cent. of Canada's production.

Actor: "As a matter of fact, I have received letters from ladies in almost every place in which I have appeared."

Rival: "Landladies, I presume."

SOVIET DICTATOR IN A NEW ROLE

Dictator Josef Stalin (right), acts as pall-bearer during the Moscow funeral of Mr. Menzhinski, head of the GPU (secret police) and called the most feared man in Russia. Others carrying the catafalque are A. A. Zhdanov, L. M. Kaganovich, M. Molotov and War Chief K. E. Voroshilov.

Fluid Spots Bleeding

Ontario Physician Believed To Have Made Important Discovery

A clear, colorless fluid which, it is claimed, experiments and practical usage have shown will stop bleeding from even large blood vessels and which may have varied uses in both first-aid and surgical operations, was announced by Dr. Luigi Pancaro, Sudbury physician and surgeon.

The haemostatic, Dr. Pancaro stated, is a development rather than a discovery and followed two years of intensive work in the physician's laboratory at Sudbury, Ont.

Dr. Pancaro experimented with dogs and rabbits and used the preparation on himself, both externally and internally, before applying it to any of his patients. Other physicians have used the preparation and, it is claimed, nearly always with marked success.

The preparation has been demonstrated before Sudbury doctors in the operating room in many cases, and in special experiments with dogs and rabbits.

Dr. Pancaro said he used the preparation twice in cases of pulmonary tuberculosis, where the patients were suffering from tuberculosis. He does not claim the haemostatic has therapeutic value but it stopped the pulmonary bleeding. Dr. Pancaro said he has not yet progressed far enough to prove its value definitely in cases of internal hemorrhage.

Give Pedestrians A Chance

Lighted Bands Aided In Directing New York Traffic

New York City is experimenting with traffic lights which give pedestrians a chance to use the streets with all vehicular traffic at a standstill. Red and green lights control vehicular traffic, as is the case with the ordinary traffic signal, but there is also a big red hand which, when illuminated, stops all traffic on wheels for a brief period while pedestrians cross intersections between light changes.

Made of artificial silk, a new type of playing cards may be washed with soap and water without damaging.

FANCFUL FABLES

Not An Education

Going To College Just Means To Acquire Greater Knowledge

A New York boy runs a university for \$25,000 a year because he claims to have wasted two years there. This is quite interesting as an extra fresh attitude of mind so many youngsters develop when they leave college. They merely don't not but spend the rest of their days growling.

They are like this youth: "They think a college can create brains. They have an idea they can get something out of college without putting anything into it. In one sense they say to the faculty: 'Now, I'm here, make me a brilliant.' They have a vague, fatuous idea that obtaining a degree will put brains into their heads."

That type of student read 10,000 books he would not get as much out of them as Lincoln got out of two old volumes: The Bible and Aesop's Fables. Ahe couldn't get any other books so he had to know them well.

When Charles F. Kettering was handed his diploma he took it home and burned it in the grate. He did not want to entertain the idea that he had finally become "educated" because they had handed him a sheepskin. "Now," he said, according to the story, "I will begin to learn."

And so Ross Ke became one of the greatest research men in his age. That is because he burned a diploma but because he was determined to keep his mind open. To-day though honored as one of the greatest living scientists he still insists he is just beginning to learn.

To send boys to college for four years is a waste of time as though there were robots of mass production, is the great American absurdity. Especially when they are proclaimed as educated. Going to college is not an education—it is merely a means to an education.

Have A Good Reason

One Who Knows Tells Why Dogs Bury Bones

We heard a discussion as to why dogs bury bones in the ground. One man was complaining about the habit of his dog and also of his neighbor's. He said it interfered with his gardening, for the dog always wanted to pick on the wrong spot. He was certain it was just a streak of the contrary in his dog. Why couldn't he eat his bone when he got it instead of taking it off and burying it, only to return in a day or so, to dig it out.

One of the other men who had had wide experience with dogs of various kinds said the dog buried the bone in order to season it. He explained that some people preferred to let fowl hang for a while before using it, and also that he had found it better for eating after it had been allowed to stand for a number of days after killing. The dog has the same sort of a taste with his bones. He puts them under the ground so they will get a certain taste of which the dog is fond. Unhappily, the dog is not so particular about his bones before eating it and the reason is he likes his bones seasoned. —Stratford Herald.

Keep Quiet About Salaries

Size Of Income Determines Rent In Elgin, Scotland

Salary increases are not spoken of in Elgin, Scotland. When one goes a raise in salary, he does not boast about it to the neighbors. The city council has voted that the size of incomes shall determine the height of the rent. The income limit for tenants occupying \$100-a-year houses will be \$1240. Those getting more must pay five per cent. of their excess incomes. Those earning \$15 a week must pay \$60 a year, with corresponding rates for other earnings. As a result of a recent income tax 78 renters were notified that their rent will be raised. One has moved and 28 have objected.

Had Good Reason

A man went to his doctor and requested treatment for his ankle. After a careful examination, the doctor inquired: "How long have you been going about like this?"

"Two weeks."

"Why, man, your ankle is broken! How you managed to get around is a marvel. Why didn't you come to me at first?"

"Well, doctor, every time I say anything is wrong with me, my wife declares I'll have to stop smoking."

Ivy on a house wall is usually a protection from dampness, rather than a menace, unless there is a defect in the wall.

Crate Fed Poultry

A Canadian Farmer's Merchant On Poultry Opportunities

There is a brisk demand for Canadian dressed poultry in the British market and recent shipments from the Dominion have created a good impression. A recent issue of the official organ of the British whole-sale poultry trade, published in London, states that Canada is one of the few countries where we have had this year packed under Dominion government supervision and grading have been all that could be desired and it is certain that next season our markets will be able to take any quantities that can be put up. If the Canadian shippers will only let the buyers know early in the season what quantities they can safely ship, it is certain that after this season early contracts will be made with large buyers in Britain, especially with Grade A, and B birds.

The quality of Canadian dressed poultry shipped from the Ottawa district was known in the Old Country 25 years ago, for C. P. McArthur, a merchant of Russell, Ontario, who was then a storekeeper and poultry dealer and buyer at Kemptville, Ontario, made two large shipments, the first of 800 birds and the second of 1,000 birds which were sold on the Glasgow market at a price that was a very satisfactory return. From then until the present, Mr. McArthur has been shipping dressed poultry and he believes that if farmers will carefully crate feed their birds to a high quality, they will find a ready and profitable market for all they can produce. In his opinion one of the principal faults of the farmers in this country is that they are losing by their present methods of raising poultry, and he believes that if farmers will carefully crate feed their birds to a high quality, they will find a ready and profitable market for all they can produce. In his opinion one of the principal faults of the farmers in this country is that they are losing by their present methods of raising poultry, and he believes that if farmers will carefully crate feed their birds to a high quality, they will find a ready and profitable market for all they can produce.

Mr. McArthur says that the most money he has made since he has been in business has come from poultry. He has found that a properly crate fed bird is a bird that is easy to sell, and he believes that if farmers will carefully crate feed their birds to a high quality, they will find a ready and profitable market for all they can produce.
